

Lab 2.5.22.1 Getting data from the user: part 1

Objectives

Familiarize the student with:

- Getting data from the user
- Printing data in different formats
- Fixing errors in a program

Scenario

Write a program which takes two values: a count of the days in one week and the value of Pi. Next, print these two values. Don't forget about data types. Your version of the program must print the same result as the expected output.

```
#include <stdio.h>

int main()
{
    /* your code */
    return 0;
}
```

Example input

```
7
3.14
```

Example output

```
How many days in the week: 7
The value of Pi to two points: 3.14
There are 7 in a week.
Pi value is 3.140000.
```
